CONVEYOR BELT SPLICING & REPAIRS

BRC has an experienced Conveyor Belt Splicing team and has also invested in the latest technologies of vulcanizing presses and equipment to continually improve conveyor belt splicing techniques.

BRC offers Hot Splicing, Cold Splicing, as well as Mechanical Splicing solutions, both ON SITE as well as within our Facility.

BRC technicians are equipped with all necessary tool kits and are well-trained. In addition to splicing, BRC also executes belt installation projects.

BRC believes in "ON CALL MOBILIZATION". It has a mobile belt repair and splicing unit which jumps into action at the first call.

The BRC team carries out the work in accordance with international standards and procedures.

BRC also supplies endless belts & vulcanizing materials as well as kits.
